In Sept. 1911 no dividend was paid on common stock, owing to decree of disintegration, but see distribution of securities below. V. 93, p. 347; V. 94, p. 418.

DISINTEGRATION.—The plan of Oct. 1911 (see V. 93, p. 1122, 1325, 1557, 1603, 1670) divided up the business of the company and its allies among "14 separate and independent companies, no one of them having control of or dominance in the trade as to any of the products manufactured by it, or as to purchase of raw material, and no one of them having any interest, by way of ownership of stock or otherwise, in any of the others. The order of the U. S. Circuit Court on Nov. 16 1911 confirming the plan enjoins the 14 defendant companies from combining ,making loans to one another, or having common officers or directors, &c., and forbids the individual defendants for 3 years from buying stock, except from each other. See V. 93, p. 1558.

The Fourteen Independent Companies.

These include the following, the American Stogie Co. alone of the existing companies being dissolved:

1. Present *Am. Tobacco Co.*, but shorn of $35,011,865 (book value) of investment securities, which were distributed as a dividend to its common shareholders, and charged to surplus, being offset by increase of book value of its investments to actual value; its bonds to be redeemed and its preferred stock reduced one-third and given voting power, and $58,699,011 of tangible assets and $56,300,989 trade-marks and brands (owned and acquired under plan) turned over to the two companies next mentioned.

2 & 3. The (new) *Liggett & Myers Tobacco Co.* and the (new) *P. Lorillard Co.* organized with capitalization as shown below, together aggregating $115,000,000, all turned over to Amer. Tobacco Co. in consideration for the aforesaid assets (see list, V. 93, p. 1122), including Federal Cigar Co., acquired by it from Am. Cigar Co., said capitalization being applied by Am. Tob. Co. as follows: The $52,118,375 5% and 7% bonds (with cash) to retire Am. Tob. bonds: the $26,229,700 7% cum. voting pref. (p. & d.) stock to retire 33 1-3% of Am. Tob. pref. stock and the $36,651,925 com. stock sold at par for cash to Am. Tob. common shareholders or others.

Said new 7% bonds and new 5% bonds mature at the time fixed, respectively, for the maturity of the 6% bonds (Oct. 1 1944) and the 4% bonds (Aug. 1 1951) of the Am. Tob. Co. previously outstanding, and are ssued under an indenture of substantially like terms with the bond indenture of the Am. Tob. Co., the 7% bonds having priority in charge over the 5% bonds in the same way that the 6% bonds of the Am. Tob. Co. have had priority of charge over the 4% bonds.

Three years are allowed for the retirement by exchange of Am. Tob. Co. bonds and 33 1-3% of its pref. stock, but in the meantime Am. Tob. Co. will have no power to vote the same.

4. *Am. Snuff Co.* turned over $8,600,588 of its tangible assets, &c., to the two new companies next mentioned, in exchange for their (total) $16,000,000 capitalization, and distributed the $8,000,000 common stock as a dividend to its own common shareholders, charging the same against surplus, and is using the $8,000,000 pref. to retire two-thirds of its own $12,000,000 pref. stock. Will also within 3 years dispose of its holdings of stock and bonds of the Am. Tob. Co. and pref. stock of Am. Cigar Co., aggregating in book value $2,530,217, upon which the Am. Snuff Co. received in interest and dividends during the year 1910 $176,680.

5 & 6. The *George W. Helme Co.* and the *Weyman & Bruton Co.*, new companies, organized with the capitalization shown below, took over a portion of the assets and business of American Snuff Co. See "4."

7. *MacAndrews & Forbes Co.* (licorice) turned over its Baltimore plant, &c. (retaining plant at Camden), to the (new) J. S. Young Co. for the latter's $2,000,000 capital stock, and distributed the $1,000,000 common as a dividend to its own common shareholders (charging the same against surplus), and is using the $1,000,000 7% non-voting pref. to retire by exchange $1,000,000 of its own $3,758,300 6% non-voting pref.

8. *J. S. Young Co.*—See MacAndrews & Forbes Co. above.

9-14. *Corporation of United Cigar Stores, &c.*—Organization undisturbed (see V. 93, p. 1108), but Am. Tob. Co. holdings to be distributed.

Am. Cigar Co. has sold for cash to Am. Tob. Co. (*a*) all the stock of the Federal Cigar Co. at $3,965,616; (*b*) the $657,000 stock owned in the Porto Rican-Am. Tob. Co. at $2,301,600, the former going to new P. Lorillard Co., the latter to the common stockholders of Am. Tob. Co.; (*c*) disposes of its interest in Am. Stogie Co. upon the dissolution of that Co. The Am. Cigar Co. does not figure as one of "the 14 independent companies," its output being relatively small.

THE TELEPHONE IN RAILWAY OPERATION.

Great progress is shown in the most recent returns of the use of the telephone in railway operation. During last year rapid advance was made in the increase of mileage of American railways along which the system has been introduced of transmitting train orders by telephone. Electric railways running for any considerable distance in country and interurban systems find the telephone installation almost indispensable for the proper working of single-track traffic at passing points. On such roads the universal use of the telephone in operation may be expected to be attained soonest, but, taking the great steam railroad system of the United States as a whole, not many years are likely to pass before the telephone has superseded the telegraph or asserted its claim to be the dominant partner in a combination service. In England it is significant that the introduction of the telephone to take the place of the telegraph code in train operation has obtained a good hold even in the management of conservative railway companies, and reports are current of the wholesale adoption of the new system. Technical improvements have been continuous in the practical working of the apparatus, insuring, by the use of "selectors" and indicators of remarkable efficiency, accuracy and reliability, while the experience forthcoming in the last two or three years on those lines that early embarked on the installation on a large scale has inspired confidence by justification of the new departure.

At the beginning of the year, according to the reports of the railroads made to the Inter-State Commerce Commission, the total length of road on which train orders are transmitted by telephone was 58,584 miles, or something more than one-third as much as the mileage on which the Morse telegraph is continued in use for this purpose.

In the list of lines which have a telephone mileage of 100 miles or more, compiled by the "Railway Age Gazette" from the reports to the Inter-State Commerce Commission and from additional information, the Atchison Topeka & Santa Fe maintains its leadership in the use of the telephone. The road now has this equipment over 5,947 miles of its 9,827, the Morse telegraph being still in use over 3,880 miles. The total exceeds that of the next principal telephone user, the Canadian Pacific, by nearly 1,000 miles. The Great Northern follows with 3,881 out of its 6,905 miles of road. The Chicago Rock Island & Pacific and the Chicago Burlington & Quincy are close competitors, having 2,977 and 2,946 miles, respectively. The Illinois Central is the remaining line that has passed the 2,000-mile mark. More than half of the Pennsylvania's mileage of 3,828 is now operated by telephone, but its subsidiary lines have not as yet taken up its use to any great extent. Among the lines of the New York Central's system, the Lake Shore & Michigan Southern has installed a full equipment, having an excess over its road mileage of 1,578, though it still operates 337 miles by telegraph. The New York Central & Hudson River has about a third of its 2,900 miles equipped in this manner and the Michigan Central two-thirds. The Central's subsidiaries and minor roads are all wholly or nearly completely equipped with telephones, with the exception of the Cleveland Cincinnati Chicago & St. Louis, which has 530 miles to complete out of its 1,880 mileage, and the Lake Erie & Western, which lacks 300 out of its 872. The Boston & Albany has only 10 miles to make its telephone mileage tally with its road mileage.

Other trunk roads which have begun the installation include the Baltimore & Ohio, which, in addition to 528 miles of telephone out of its road mileage of 3,441, will soon have 235 miles equipped with two circuits, one for dispatching and one for messages. The Philadelphia & Reading has made a beginning only, having as yet no more than 36 miles of telephone out of its

983. The Erie also has only 217 telephonized miles out of its 2,488 road mileage. The Harriman lines have still the great bulk of their train operation under the older telegraph system, the Southern Pacific having as yet only 713 miles out of 6,083 telephonized and the Union Pacific 606 out of its 3,374 miles. The Union Pacific, however, has almost equalized the mileage of message telephone wire installation with its road mileage. In this feature of message telephone wire installation it may be noted that the Pennsylvania bears the palm, having 6,313 miles of wire, the Lake Shore, Illinois Central and Louisville & Nashville showing the next largest figures.

Out of the hundred roads mentioned in the list, the number of those which have totally displaced the telegraph by the telephone system in despatching and operating trains is 28. These naturally include the wealthiest or most recently built roads, such as the Delaware Lackawanna & Western, with 974 telephone mileage out of its 985 road mileage; the Virginian's full 468, the Florida East Coast's 522 out of 575, while small roads similarly entirely equipped are the Denver Northwest & Pacific, the Buffalo & Lake Erie, Cumberland Valley, Duluth & Iron Range, Chicago Indiana & Southern, the Oregon Trunk and the Western Ohio.

The conspectus of these hundred roads in comparison with what had been undertaken a year ago is evidence of very sturdy growth of the use of the telephone for train despatching. Operation has now been carried on long enough to afford ample proof of its value, though, of course, by comparison carried out on a very much smaller scale, the increasing use of portable telephones is no less worthy of note. It requires time to familiarize train conductors and other members of their crews with the technical use of the handy apparatus that in case of accident may remove the perils of isolation and bring speedier assistance to passengers and railroad men. As might be expected, the greatest progress in the use of portable telephones is to be found on the long-distance railways in the thinly inhabited parts of the country. Roads like the Union and Southern Pacific, the Chicago Great Western, the Denver & Rio Grande and the Great Northern report equipment in various degrees of portable telephones on passenger, freight and work trains. The Oregon Short Line, of 1,664 road mileage, though it operates only 49 miles for dispatching purposes, relying on the telegraph, has, however, provided telephones on all its freight and passenger trains. Similarly, the San Pedro Los Angeles & Salt Lake, though it has no regular telephone circuit, provides all its trains with the means of quick communication with headquarters in emergencies by the use of the "telegraphone." In every baggage car and caboose is carried a portable telephone with the "fish-pole" attachment to connect it with the telegraph line at any point. Along the main line, about 800 miles in length, stations about 100 miles apart are equipped for receiving these telephone messages. The El Paso & Southwestern has the same arrangement and a rapid development of the system is anticipated in the West. On Eastern roads the Delaware & Hudson has it on its trains, and the Lehigh Valley has gone as far as any line in its complete installation, having for its 1,382 road miles 800 miles of telephone wire for transmission of train orders, 150 siding stations where trainmen can use the telephones, and 150 passenger trains, 375 freight trains and 75 wrecking or work trains, all equipped with "portables."

A typical outfit consists of a portable telephone and a sectional fish pole 18 feet long to make connection with the wire at any point. These are supplied to bridge and rail-laying gangs, track supervisors, work trains, tool trains, train-masters and superintendents. The efficacy of the equipment in the saving of time, the expediting of assistance and the prevention of derailments has been time and again demonstrated where records have been systematically kept. Particularly is this the case where telephones have been made accessible night and day at all meeting-places including "blind sidings." The Missouri Pacific in its installations of 283 miles of message wires has in one division fitted them up at all the sidings. The same line has since Jan. 1 equipped 824 miles of its line with telephones for manual block signaling. Another line, the Wheeling & Lake Erie, which has recently begun the use of the telephone system, has found that the saving of time gained in the running of its freight trains in twenty days was equivalent to two days' use of one train and engine crew. Delays in getting wreck trains to the scene of action easily occur, but the ready use of the telephone is a great aid to the prompt arrival, and one line, the Norfolk Southern, estimates that the efficiency of the work trains is increased 50%. Delays that previously could not but have been of several hours' duration have been lessened in accident to both passenger and freight trains The despatchers, notified by use of the telephone where the telegraph communication was out of the question, has been able to send engine and caboose to the breakdown, transfer the passengers and carry on the ordinary traffic of the line around the stalled train without long waiting. During last winter's heavy snowstorms the location of trains held fast in the drifts was in several instances quickly known so that relief was soon forthcoming.

Over and above the use of the telephone in the various ways referred to is its spread in connection with the manual block signaling. Some 17,368 miles of the railroads are now equipped in this way, an improvement which ought to tell strongly in no long time in the reduction of accidents.

CAR REPAIRS AND MAINTENANCE.

Among the subjects discussed at the recent railway conventions the maintenance of freight cars came in for considerable attention. Railway managers in investigating the various causes of the rising cost of operation have turned their eyes to the repair shops and found that the expenditure on cars that have broken down from original defects or as a consequence of rough usage could probably be greatly reduced by checking the evil at the beginning. It has been stated on good authority that the cost of maintenance of freight cars has in the last eleven years been increasing by 2% a year and that on some roads to maintain freight cars in proper condition costs more than all the fuel burned by them. The average cost of repairing is put at $83 per year for each and every car on the track. Since 1908, owing to the more frugal management necessitated and the restrictions placed on re-equipment with new rolling stock, the old cars have been used as long as possible and returned again and again to the repair shops. Should general prosperity return to the railways in the next year or two in the measure anticipated, it is evident that the replacement of worn-out cars will be necessitated on a large scale. Already heavy orders are being placed. One company asks for 6,000 flat cars, another for 4,000 coal cars and several are in the market for batches of

1,000 box cars A special order given by a trunk line is for 2,000 to 3,000 centre sills for the reinforcement of freight cars. Regarding the specifications of this new rolling stock and the economic repair of old cars, the Master Car Builders' Association had much to say at Atlantic City. Taking a serious view of the situation, the speakers discussed with particular earnestness the revision of standards and practice, the damage to freight equipment by unloading machines, overhead inspection, carelessness in handling the cars in the yards and the hard usage to which they are subjected on the road.

Ocular proof of the "punishment" which freight cars receive in transit is easy to obtain, for along even the best managed railroads sidings frequently exhibit derelict cars left stationary because of a break-down of axle, wheel, or draft gear, or owing to damage inflicted on the superstructure by poor loading Photographic illustrations of the actual conditions have been given by the "Railway and Engineering Review" which need but little insistence on the moral they convey, since they picture clearly the nature of the damages done. It cannot be too thoroughly impressed upon the officials and workmen engaged in the operation of freight trains that the greater earnings of speedy operation are easily thrown away when haste and carelessness add to the burden of increased repairs. The consequent cost of repairs on the "bad order" storage tracks and in the yards offsets any profits that may be made by the transportation department. It is a moot question whether the greater number of injuries done to the cars is received in the switching yards or on the road. When damage is seen such as is constantly inflicted on steel cars so that their sides are twisted out of shape and their angles and gear bent or weakened, not only in accidents of derailment on the road but frequently in the ordinary process of classification and switching in both gravity and non-gravity yards, the hard case of the common wooden car can be easily imagined. Handled indiscriminately between heavier and stronger steel cars, the wooden car is often between the hammer and the anvil and its destruction is inevitable. As the weakest chain in the link, a worn-ont wooden car made up in a freight train intended for running over foreign territory is a menace to traffic and an invitation to a breakdown, with all the possible injurious consequences. Yet the degree of risk of such accidents depends upon the measure of vigilance and care exercised by the yard-master and his subordinates in the makeup of the trains. The very improvement that has taken place in the material construction of freight cars has brought with it more severe treatment than ever in handling the cars. The doors of box cars are especially liable to suffer from rough usage and perfection is still far to seek, though new patterns and inventions are continually being brought out for the ideal door that will protect the contents of the car from theft or injury.

The report of the Committee of the Master Car Builders' Association dealing with overhead inspection recommends better measures for inspection and location of responsibility. It is impossible to estimate approximately the amount of freight loss and damage entailed by racked and opened car bodies, leaky roofs and doors and windows and sides. The reports to the companies of their operating officials and the claims made upon them by shippers tell the tale. This particular report of the Association mentions many glaring instances. One railroad company was mulcted to the tune of $200,000 in one year for loss of grain due to the causes mentioned. Tests made at Galveston of 7,429 cars of grain showed that 67% were leaking, and of these 40% were leaking at the doors and 57% at other points. The common injuries inflicted on steel hopper and gondola cars are frequently due to heavy, ill-judged or careless loading, which plays havoc with the elaborate dumping gear. Sometimes an oversight of the designers and carelessness of switching crews combine in causing the car injury, the push pole when not properly provided for being a handy weapon for battering pressed steel end sills out of their regular form.

In another report the Master Car Builders' Association calls attention to the damage incidental to freight equipment by unloading machines. The use of mechanical appliances in loading and unloading is bound to increase, and designers of freight cars will therefore do well to take carefully into account the lessons to be learnt from the experience of the roads already available. The Pennsylvania Railroad officials have found that in the use of larger unloading machines 95% of the cars incurred damage and that the safety appliances were injured on 52% of these cars. Such a condition calls for early attention for the improvement of design in both machine and car. The subject must come sooner or later before the Inter-State Commerce Commission, which has already noted that to defects of equipment are to be attributed twice as many derailments as to defects of track.

NEW TYPE LOCOMOTIVES AND FUEL CONSUMPTION.

Results of recent investigations into fuel consumption by locomotives of the most modern type used on American railways were presented in very comprehensive fashion at the International Railway Fuel Association held at Chicago. Both in the United States and in Europe the question of reducing the coal bill by securing the greater efficiency and tractive power of the machine upon a given quantity of fuel is vital for the companies. The need of economy in operation and the elimination and prevention of waste has been pressed home by the forced suspension of coal-mining which has actually taken place in England, Germany and France during the last twelve months, and which constitutes at all times a standing menace to the normal operation of the railroads as a commercial undertaking. At this juncture the exhaustive treatment of the subject of fuel consumption, particularly as it relates to the construction of the Mallet and other engines of greater weight and capacity, and of new designs coming into use in all countries and under widely varying conditions, is opportune, and promises to be fruitful. As such it was regarded at the convention, where the ably-prepared papers aroused much commendation.

Discussion was based on the leading paper, read by the Director of the College of Engineering, in the University of Illinois, Dr. W. F. M. Goss. His exposition of the problems facing the locomotive designers and builders, with the definite conclusions formed from his exhaustive laboratory experiments, were complemented in the most useful way by the papers of railroad operating chiefs and experts, who had arrived at conclusions similar in the main, from independent inquiry and as a result of tests applied to locomotives in practical operation on different systems. Robert Collett, Superintendent of Locomotive Fuel Service of the St. Louis & San Francisco, was able to present figures from an individual engine daily-performance

sheet, giving a record of a year on one division of 250 miles. He was also able to summarize replies to a circular letter sent to the members of the Association. Data relating to like performances were supplied by the Engineer of Tests of the Atchison Topeka & Santa Fe Railway, H. B. MacFarland, taken on 18 locomotives operating over the divisions to which they are regularly assigned. D. C. Buell, Chief of the Educational Bureau on the Union Pacific, Illinois Central, Yazoo & Mississippi Valley and Central of Georgia, illustrated in the most effective way, by the application of steriopticon and cinematograph, the effects of good and bad firing. This paper surveyed the entire field of fuel economy; it received the praise of the Chicago & North Western's Assistant Superintendent of Motive Power and Machinery, who suggested its issue in pamphlet form by the Association for use by the railways, and brought out the fact that various other roads, like the Baltimore & Ohio and the Missouri Pacific, were practicing economy along the same lines and introducing experiments and practices of a kindred nature.

Improvement in locomotive construction to obtain greater tractive power has been rapid in recent years, but, as Dr. Goss axiomatically expressed it, the weight of the modern locomotive cannot be greatly exceeded except at the expense of extensive improvements in track, or through the adoption of an arrangement of wheels which will permit the load to be much more widely distributed than at present. Taking for illustration the Mallet locomotive, which has come into vogue as the most powerful engine suited to the severe traffic of American railroads, it may properly be asked how far may this machine be made even more efficient by adaptation to the requirements of the fuel it has to burn. Compounding cylinders in place of simple expansion and superheating steam have effected great saving in fuel consumption. The recent Chicago convention leaves the conviction that another large economy may be accomplished by the improved construction of the drafting apparatus in locomotives.

There are now some 500 Mallet locomotives in the United States, Canada and Mexico, illustrating all possible wheel arrangements and boiler designs known at present. It is claimed for the Mallet that it can haul from 21% to 92% greater loads than the older type with the wheel base of 2-8-0. Two Mallets will do the work of three consolidation engines. The reduction in the number of trains is compensated for by the larger and heavier trains drawn by them, and this, in turn, produces a great saving in the wages of the engine and train crews. A Mallet, tests show, saves on the average three pounds per 100-ton miles in fuel consumption.

Mr. MacFarland's paper emphasized, what is a matter of common knowledge, that, after all its evolution, the modern locomotive is very inefficient in its transformation of the potential energy supplied in the fuel to kinetic energy transmitted to the drawbar. At average working and at high speeds, his study confirms the opinion that the tractive effort is altogether too low, and is far below the ideal. The general types employed by him in his tests were, in the passenger service, the Pacific balanced compound, the Pacific simple and the Atlantic balanced compound; and in the freight service, the Santa Fe tandem compound, the Santa Fe simple, the consolidation tandem compound, the consolidation simple, the prairie balanced compound, the prairie Vauclain compound, the Santa Fe Mallet, the consolidation Mikado Mallet and the prairie Mallet. The possibility of improving the efficiency of locomotives is seen from the calculation based on the data obtained, that the possible saving in fuel consumption ranges from 17% in the case of single-expansion freight locomotives to 52% in the case of the compound passenger locomotive.

There has not been much variation in the method of creating drafts in an engine since the introduction of the multi-tubular locomotive boiler in the early days of the steam engine. A locomotive to be a "good steamer" in operation is one that can be handled in such a way that it will steam freely on the road and get its tonnage from terminal to terminal with least delay. This depends at present in great measure on the drafting arrangements. These now, it is calculated, absorb on the average 1.00 to 0.66% of the potential power, and at high speeds the inefficiency is greatly increased on account of the great back pressure. To reduce this pressure by the variable exhaust or other devices is one of the solutions of the difficulty.

Dr Goss's suggestion was of a more radical kind. He directed attention to the need of larger grate areas in locomotive practice. Such a change will be found imperative, he insisted, if locomotives are to be supplied with such grades of coal as are now commonly used. The entirely new locomotive design he outlined might give a grate area of 150 feet, as compared with the average of 50 feet at present in use. Such a size would need a length of from 25 feet, and would mean the adoption of an articulated form of locomotive, to admit of this, between the two systems of wheels. Automatic stokers would do away with the use of a tender, and the work of the firemen would be lightened; but the greater loss of fuel on the grate at the end of a run would have to be reckoned with. It is also to be considered that other methods of supplying heat for increased capacity may soon be forthcoming The steam boiler may be superseded by improved gas producers, and by the increased use of oil, both raw and in the form used in such engines as the Diesel, to the great saving of weights as compared with the cumbersome grates and stokers.

Much sound advice was given in the accompanying addresses relative to the enginemen and firemen, upon whose shoulders the blame for extravagant fuel consumption is frequently laid without due consideration for the exigencies of making time with the unimproved steam-producing apparatus. More care can evidently be given in operation to the preparation of the coal to be burnt by proper grading, washing and distribution.

What one line has done in the saving of coal in the past year by 12%, mainly through the better education of the engine men, and in another by the reduction of time in cleaning the fires at the terminals, may be equaled and surpassed by others. All such systematic improvement will conduce to the reduction of the coal bill, that now absorbs 8 to 10% of the gross earnings of the railways, which by themselves use 1-5 to ¼ of the total coal production of the country. The entire fuel cost of the railways is estimated at $240,000,000 annually, or the sum of $4,000 per locomotive per year. If it is legitimate to put at $100,000,000 the annual saving in fuel effected by the substitution of compounds in place of single-expansion locomotives, it is not unreasonable to suppose that an additional saving of $50,000 000 can be made by better drafting, while increased haulage efficiency could be obtained from even the best locomotives now put on the railroads.

HISTORY, LEASES, &c.—In August 1902 the St. Louis & San Fran. acquired the greater part of the stock, as said below. In 1911 merged the Evansville & Terre Haute, theretofore controlled. See STOCK below.

The Chicago & East. Ill. owns $1,000,000 stock of Chic. & Western Ind.

STOCK.—Com. stock outstanding was $7,217,800 ($15,000 p. m.); pref., $8,830,700. In addition, $6,408,300 com. and $161,300 pref. were held in trust by Trust Co. of America in July 1911 as a part of "trust assets" under agreement dated July 1 1905, for improvements, acquisitions or refunding, to be terminated on satisfaction of the St. L. & S. F. stock trust agreements below referred to. V. 85, p. 1001.

Stockholders voted July 1911 to increase the authorized preferred stock to $15,000,000, to merge the Evansville & Terre Haute and Evansville Belt, the E. & T. H. common to receive 83 1-3% in C. & E. I. preferred and the Evansville Belt stock par, calling for $3,209,300 pref. and increasing total amount of pref. issued to $12,201,300; remainder reserved for new mileage at $10,000 per mile. V. 92, p. 1374, 1435; V. 93, p. 229, 588.

The St. Louis & San Francisco RR. has given in exchange for the common and pref. stock its stock trust certificates at the rate of $100 thereof for each $100 share. V. 75, p. 289. All of the $7,217,800 common, and in June 1912 $8,276,000 of the $12,146,500 pref. then outstanding, had been exchanged on this basis. The St. L. & S. F. has the option to retire the trust certs. at any time at $250 per $100 com. stock trust certificate and $150 per $100 pref. stock trust certificate, payable in gold, and obligates itself to pay off entire issue in 40 years from July 1 1902 at same rates, meanwhile obligating itself to pay 10% dividends on the com. and 6% on the pref. trust certificates, respectively, these amounts being equivalent to 4% on the principal sum to be eventually received in payment therefor. Upon failure to pay any dividend within 30 days after demand therefor, any holder may surrender the certificates to the trustee and receive the shares represented thereby. V. 75, p. 289, 393, 1031; V. 82, p. 48. A majority of common stock trust certificates were in 1905 exchanged for certificates in denominations of $1,000 each, representing 4 shares of common stock, bearing 4% int., and payable in 1942 at face value. See form, V. 80, p. 1856.

PLAN.—The plan of the above committee, declared operative Oct. 26 1909, provides that a new co. shall acquire the road after foreclosure, subject to the $2,000,000 prior lien mortgage of 1900. The committee is given power to sell in the common interest.

The plan (V. 89, p. 285) authorizes an issue of $15,000,000 "general and refunding" 30-year gold 4½s. Present issue, $2,850,000, of which the $1,100,000 issuable in exchange for the old consols and unpaid coupons are to bear only 3% interest for the first 6 years. For six years the new bonds are to be subject to call at par on any int. date on 60 days' notice; thereafter at 107½. Of the bonds, $2,000,000 will be reserved to refund prior lien bonds and $150,000 to aid in refunding, and $10,000,000 for extensions, &c.

*Interest on these bonds reduced to 3% for first six years.

Out of the $2,850,000 "general & refunding" 4½s, $850,000 will be placed in the treasury, and it is estimated that after providing for the floating debt the new company will have free treasury assets in cash and "general and refunding mortgage" bonds of over $1,000,000 to make needed improvements.

The new company will have a fixed annual charge of about $154,000 for the first 6 years, which will be thereafter increased about $15,000 by the increase in rate from 3% to 4½% on the new bonds exchanged for old cons.

Security-holders who prefer not to make a cash payment as above provided are offered in new stock at face value voting trust certificates for $1,000 income mtge. bonds, $60 in new stock; for $100 pref. stock, $4 in new stock; for $100 common stock, $2 in new stock.

For old $5,500,000 6% note issued under loan agreement No. 1, the holders will receive the $7,500,000 Tunnel bonds pledged and for the $7,000,000 6% notes issued under loan agreements 2, 3, 4 and 5, the holders will receive $4,000,000 Ser. HISTORY.—On Dec. 1 1895 succeeded, per plan in V. 61, p. 368, the N. Y. Lake Erie & Western RR. Co., sold in foreclosure under its second consolidated mtge. The company holds in fee or through ownership of all or practically all the stock of the independent companies the line from New York to Chicago (including the Nypano RR. and Chic. & Erie companies), and also all subsidiary lines except a few small properties.

COAL AND STEAMBOAT PROPERTY.—The *Erie* coal properties represent an aggregate of 12,400 acres of anthracite, of which about 9,000 acres are held in fee; also 53,000 acres of bituminous coal lands held in fee, 14,000 acres of bituminous held under mineral rights. Its coal and coke tonnage in the year 1910-11 aggregated 19,478,808 out of the 37,570,662 tons hauled. The Union Steamboat Line (merged in Erie RR. Co. June 30 1896) has terminal, &c., properties in Buffalo and 8 lake steamers. See V. 63, p. 514. The *Penn.* coal properties acquired in 1901 are additional. V. 82, p. 1322.

STOCK.—The voting trust was dissolved May 1 1904. V. 78, p. 1549. The prior lien and the general lien bonds of 1895 have 10 votes for each $1,000 of principal, their authorized issues aggregating $175,000,000, of which $83,724,000 issued to July 1911. Provisions of preferred stock were in "Supplement" of April 1897, page 3. V. 66, p. 335, 573.

BONDS.—The new first consolidated mtge. is for $175,000,000 (Farmers' Loan & Trust Co., trustee)—see abstract of deed, V. 62, p. 89, and secures $35,000,000 prior lien and $140,000,000 general lien bonds. Both series have voting power; see "Stock" above; also issue of Feb. 1912.

Of the $140,000,000 *general lien bonds*, $92,668,000 were reserved for the ultimate acquisition of bonds and guaranteed stocks left undisturbed on various parts of the system (see list, V. 62, p. 89), and $17,000,000 were reserved for new construction, betterments, additions, &c., after 1897—not over $1,000,000 to be used in any one year. In July 1911 $35,885,000 general lien bonds were in hands of public, $12,839,000 additional being deposited under collateral trust notes—see below.

The collateral trust 4s of 1901 are secured by 51% of the entire N. Y Susq. & Western stock ($26,000,000 total issue), all of the Pennsylvania Coal Co. stock, and the stock of the Erie & Wyoming Valley RR., Scranton, Pa., to Lackawaxen, 65 miles, and Delaware Valley & Kingston RR. A sink. fd. of 10c. per ton of coal mined purchases bonds at not exceeding 105; otherwise to be applied to the drawing of bonds by lot; all such bonds to be kept alive and the accruing int. thereon to be added to the sinking fund, which, it is estimated, will be sufficient to retire the whole issue at or before maturity. V. 71, p. 1219, 1311; V. 72, p. 44, and circular, p. 136, 532, 257; V. 79, p. 212. In 1901-11 $4,525,000, included above as outstanding, was purchased by the sinking fund

The conv. 4s of 1903 ($50,000,000 authorized issue) will be issued from time to time as required and may be made convertible into com. stock at a price to be fixed when the bonds are issued, but not less than $41 ⅔ per share; they will cover all the company's property subject to underlying liens. The first $10,000,000 (series A) issued for improvements and equipment is convertible on basis of $100 bonds for $200 stock to April 1 1915.

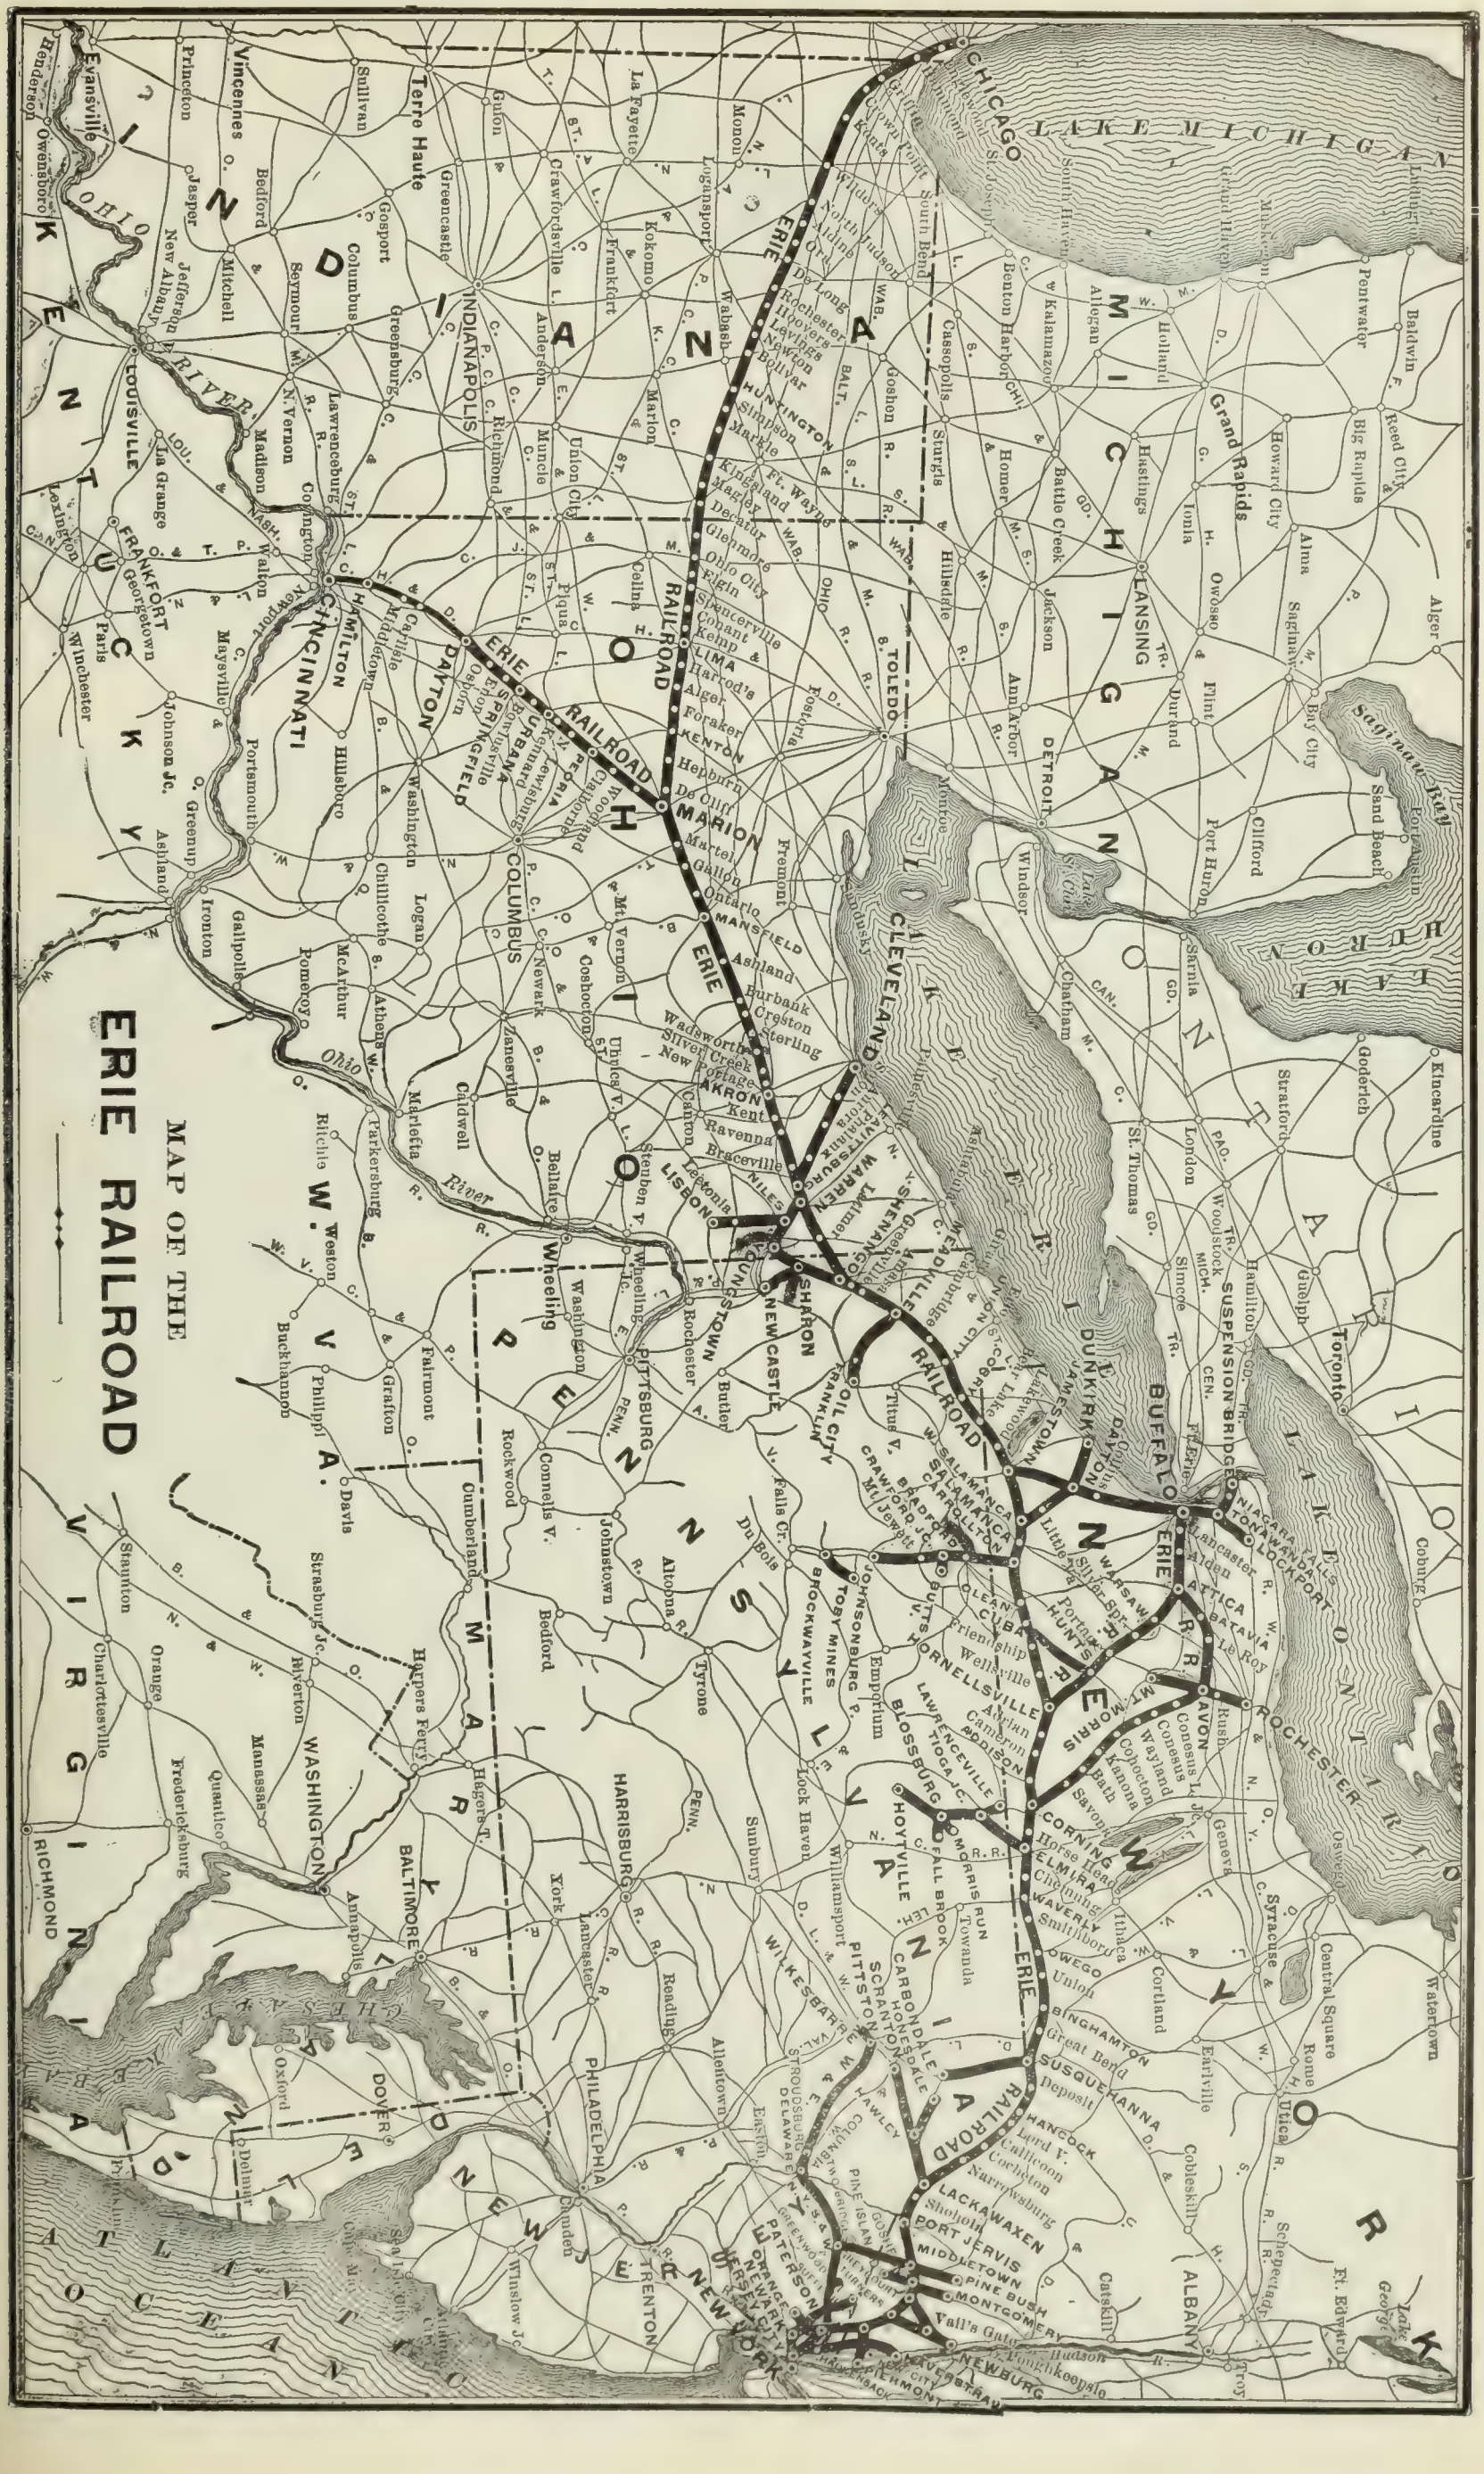
Series B bonds for $12,000,000 are convertible into common stock at $60 per share at any time since Oct. 1 1907 and before Oct. 1 1917. V. 76, p. 382, 541; V. 78, p. 768; V. 79, p. 2205; V. 84, p. 270.

The Erie & Jersey RR., with $600,000 auth. stock, completed in Jan. 1909 a low-grade cut-off from Highland Mills via Campbell Hall to Guymard, N. Y., about 40 miles. In Oct. 1911 $4,550,000 3-year 5% notes were sold, secured by $4,000,000 E. & J. bonds (auth. issue $10,000,000 1st 50-year 4s) and $3,000,000 Genesee River 1st M. 4s to retire the $3,000,000 extended Erie & Jersey notes due Dec. 1 1911 and maturing notes of Genesee River RR. V. 93, p. 940, 1022.

In June 1907 the Genesee River RR. was authorized to make $6,000,000 mtge. covering road from Hunts to Cuba, N. Y., 32.9 miles, completed Oct. 1910. See paragraph next above. V. 84, p. 1366, 1488; V. 81, p. 777.

The $12,500,000 6% collateral notes dated April 8 1911 were issued to retire the remainder of the notes of 1908 then maturing (see "Ry. & Ind. Sec." for Jan. 1911). They are secured by deposit of $12,839,000 Erie "general lien" bonds (additional to the amount shown above as outstanding); $985,000 Erie convertible bonds, series "B," $336,000 Erie RR. Pennsylvania collateral bonds, $217,000 Chic. & West Ind. consol. 4s, $95,000 Mutual Terminal Co. of Buffalo 4% notes, $6,306,000 N. Y. Susq. & West. pref. stock, $163,100 Lehigh & Hudson Riv. Ry. stock and $145,700 Temple Iron Co. stock. V. 92, p. 594.

The $10,000,000 3-year 5% collateral notes dated April 1 1912 are secured by deposit of $10,000,000 convertible 4% bonds, series C, due April 1 1953, $1,000,000 gen. lien 1st consols, $3,000,000 Erie & Jersey RR. 1st 50-year 4s and $2,000,000 Genesee River 1st 50-yr. 4s. The deposited securities can be released only on payment to the trustee of the withdrawal values, viz.: 70% for the gen. M. and Genesee River 1st M. bonds, 80% for the 1st consols and 75% for the Erie & Jersey 1st M. 4s, the proceeds to be used in the purchase and cancellation of the notes at not above par. V. 94, p. 982, 630, 1056, 1118.



In June 1912 $450,000 5% serial notes were sold to purchase ore-unloading and handling plants. V. 94, p. 1695.

FINANCES.—During the year ending July 1 1909 maturing coupons to a total of about $6,000,000 were purchased on behalf of the company by J. P. Morgan & Co. in order to place the road in position to complete needed improvements and additions. The coupons so purchased were pledged with other collateral to secure about $14,000,000 of 6% notes due April 8 1911. These notes were paid at maturity in 1911 and $12,500,000 new 6% notes were issued (see "Bonds" above), without the coupons, as part collateral. The financial plan as originally contemplated in 1908 called for the creation of a large car trust and the issuance of $30,000,000 bonds to take up the first-named note issue and to fund coupons maturing on the prior lien bonds and general lien bonds during the five years ending June 30 1914. V. 89, p. 1086; V. 87, p. 1245; V. 88, p. 504, 853, 882, 1061, 1127. In Oct. 1911 sold $4,550,000 5% notes to retire maturing obligations, and in April 1912 $10,000,000 to complete double-tracking between N. Y. and Chicago. See above.

STOCK.—Authorized, $45,000,000 (par of shares, $100 each), of which the $25,000,000 common is owned by the Grand Trunk Ry.

BONDS.—The Canadian Government agreed to guarantee 3% 1st mtge. bonds for an amount up to 75% of the cost of construction of the Western division, such amount (*a*) in the case of the Prairie Section not to exceed $13,000 per mile, or £3,210,000 in all; and (*b*) three-quarters of total cost per mile from the mountains to Pacific Coast, called Mountain Section. Total issue, £14,000,000; Royal Trust Co., Canada, trustee. V. 80, p. 996, 1234, 1363; V. 81, p. 507, 613; V. 89, p. 224, 286; V. 91, p. 214, 276. Co. in the proportion of 75% of such earnings to the holders of the Govt bonds and 25 to the holders of the bonds of this division guar. by the Grand Trunk Ry. Co.

New Lines.—In May 1912 the city authorities entered into agreement with this company (V. 94, p. 1507, 1566) and the Brooklyn Rapid Transit Co., providing, subject to the approval of the court, for expenditures aggregating about $260,000,000 for the establishment of comprehensive dual systems of rapid transit serving all boroughs. For this company the new construction will mean:

The 7th Ave. subway will at its southern end divide so as to reach both the Battery and, (via a new tunnel under the East River to Clark St., Brooklyn, and the present subway,) the Flatbush Ave. (L. I. RR.) depot, whence it will run with 4 tracks along Eastern Parkway to Buffalo Ave., with 2-track elevated extension on Livonia Ave. to New Lots road. Manhattan Ry. is to have third track on 2d, 3d and 9th Aves.

Subway Leases, New and Old, to Run 49 Years—Re-Capture.

Under the terms of the contract the Interborough Rapid Transit Co. will modify its present leases, fixing the expiration of all its subway leases at 49 years from the completion of the new subways, which shall be not more than 4 years from the letting of the formal contracts, with allowance for contingencies. The company will be authorized to take annually during this period from the aggregate net earnings of the old and new subways the sum of $6,335,000, being the average amount of the net earnings during the last two years on the present subway; also the sum of $4,620,000, the equivalent of 5% int. and 1% sink. fund, on the investment by the company of $77,000,000 of new money, viz.: $56,000,000, the company's contribution toward the cost of construction, and $21,000,000, the estimated total cost of equipping the new subways. These payments are to be a first charge on such net earnings and are to be cumulative.

All new lines constructed are after 10 years to be subject to re-capture by the city in groups upon paying the company the cost of its investment plus 15%, which sum decreases as the term continues, and the actual cost of its equipment, less sinking fund and deferred maintenance. The new equipment to the extent amortized from the sinking fund to become the roperty of the city upon termination of lease.

Sale of $170,000,000 *New First Mortgage 53-Year 5% Gold Bonds.*

To cover the company's requirement under the plan there have been sold to J. P. Morgan & Co., and through them to a syndicate, $170,000,000 new 1st M. 5% 53-year gold bonds, to be taken and paid for in four yearly installments, viz.: in 1912-13, $78,000,000; 1913-14, $30,000,000; 1914-15, $30,000,000; 1915-16, $32,000,000. See V. 94, p. 1507, 1565, 1249.

The mortgage securing the bonds will also provide for the issue of such additional amounts as may be needed for extensions and improvements as may be authorized by the city and agreed to by the company during the period of the lease—as provided in the agreement.

A cumulative sinking fund of 1% will begin 5 years from the date of opening the new subway, or in any event not more than 10 years from the date of the bonds. Bonds may be drawn for the sinking fund at 110, or bought in the market at a lower price, and by the operation of the sinking fund the whole issue will be amortized during the term of the lease. The company reserves the right to increase the sinking fund at any time.

After the foregoing payments the city will take out 8.76% on its investm't.

Interest during the construction period has been provided for as part of the cost of the work. As indicated above, the company believes that when the new subways are open for operation, the earnings of the property will show from the start an ample margin above all fixed charges.

CONTROL.—In Dec. 1907 $33,912,500 of the $35,000,000 stock had been exchanged for 200% in 4½% collateral trust bonds of the Interborough Metropolitan Co. (which see above), secured by the stock exchanged.

CONTRACTS.—Contract No. 1 with city called for the construction of the road from City Hall north for $35,000,000 and its lease to the company at a rental equal to the interest on the city's bonds issued for construction (out not for easements, &c.), and a sinking fund of 1% yearly to retire the bonds. See provision, V. 82, p. 1157. In Dec. 1907 $5,934,798 was allowed for extra construction. V. 85, p. 1461. The company also at its own expense provided the electrical equipment (costing over $26,000,000; see V. 82, p. 452). For contract see V. 69, p. 1063. The extension from City Hall, Manhattan, to Brooklyn (contract No. 2) was built without aid from the city except about $4,000,000, and leased. V. 86, p. 196; V. 75, p. 184, 1086, 1202. See V. 76, p. 101, 1234. As amended in 1912 the lease is to terminate in 49 years from the opening of the new subways (see above), the city to have the right after 35 years to take over the unexpired portion of leases under contracts Nos. 1 and 2 (see below) upon payment of their then worth, if it shall take over any of the lines under the new contract (of 1912) after 10 years.

DIVIDENDS.—July 1904, 2%; 1905, 8¼%; 1906, 8½%; 1907 to July 1911, 9% yearly (Q.-J.). In Oct. 1911 2½% regular and 1% extra, to bring the disbursements for the past year to 10%. In Jan., April and July 1912, 2½%, and in June 1912 special 5%, mainly from surplus profits of Rapid Transit Subway Construction Co. V. 94, p. 1695.

The 3d M. bondholders' committee bought up practically all of the 2d M. bonds at par and int. and recapitalization is pending per plan in V. 92, p. 1310, subject to valuation to be fixed by Texas RR. Commission. V. 93, p. 1105. The I. & G. N. Holding Corporation was incorporated in Virginia in Nov 1911 with $5,500,000 capital stock to be used in the reorganization of the railroad company in such a way as to preserve the equity of the 3d M. bondholders in case the Texas RR. Comm. do not allow a greater valuation than $30,365,000 for the I. & G. N. See V. 93, p. 1386.

Holders of $2,961,000 3d M. bonds will receive common stock to an amount not exceeding the par of the bonds and overdue interest thereon. Bonds deposited to May 9 1911 to come ahead of those thereafter deposited in distribution—see STOCK below. Depositary, Equitable Tr. Co., N. Y.

Annual fixed charges of new company will aggregate $1,349,840 and after payment or redemption of notes $1,407,340.

The cash required ($15,340,000) has been raised as follows: (*a*) by the sale to bankers of $11,000,000 3-year 5% notes redeemable at 101% and int. on 30 days' notice, secured by deposit of $13,750,000 1st ref. M. bonds, of which $12,150,000 has been deposited by the new company and $1,600,000 by the syndicate; and (*b*) by the sale to a syndicate of $1,600,000 1st ref. M. bonds, $3,400,000 pref. stock and $2,500,000 common stock. In case the valuation fixed by the Texas RR. Comm. calls for an amount of new securities less than the amount called for by the plan, the reduction will affect first the amount of new common stock to be given for the old 3d M. deposited after May 9 1911 (V. 92, p. 1310).

STOCK.—New common stock, $6,000,000 (subject to reduction as above stated). The $5,000,000 5% non-cum. pref. stock will be entitled to share at the same rate as the common in all dividends in excess of 5% upon the common, and to be preferred as to face value and accrued dividends in case of liquidation; $1,600,000 is to be reserved for exchange of a like amount of the initial issue of 1st ref. M. bonds which are deposited under the 3-year 5% notes. Upon the liquidation of the notes from time to time the first ref. bonds contributed by the syndicate are to be proportionately surrendered to the new company upon the issue by it to the syndicate of a like par amount of its preferred stock.

BONDS.—Of the new 1st refunding M. 30-year 5s ($50,000,000 auth.), $12,150,000 have been pledged as security for the 3-year 5% notes and $1,600,000 sold for cash to the syndicate and by it deposited as further security for said notes (see above). $11,489,000 are reserved to refund underlying bonds and $24,761,000 are reserved, under restrictions, for additional equipment, additions, extensions and improvements. An agreement has been made to sell a maximum amount of $1,000,000 of the bonds yearly for 3 years as required for improvements, extensions and equipment. Compare V. 94, p. 350. The secured notes through their collateral cover entire property at (including underlying bonds) about $20,500 per mile. V. 94, p. 350.

V. 93, p. 469, 666; V. 94, p. 68.

STOCK.—After 5% on each, pref. and com. share pro rata. In Dec. 1911 the authorized pref. was increased from $4,000,000 to $12,000,000 and the com. from $13,500,000 to $18,000,000. The steam road (since partly electrified) was leased April 1 1873 for 401 years to the N. Y. Cent. & Hudson R. RR. Co. for interest on the bonds and dividends of 10% per annum, payable J. & J. on the entire capital stock of N. Y. & Harlem RR. Co.

BONDS.—The first consolidated mtge. of 1896 is limited to $62,500,000, the balance unissued being reserved to retire the underlying bonds. V. 73, p. 502; V. 74, p. 151; V. 75, p. 505; V. 77, p. 1785; V. 78, p. 229. They are a 1st M. on about 898 miles of railroad, upon important terminals at Norfolk and Lamberts Point, upon the Ohio River Bridge and the Roanoke Machine Works; also a consol. M. upon 776 miles subject to the undisturbed liens. They also cover equipment. See **abstract**, V. 64, p. **376**; V. 72, p. 137, 438, 532, 723, 1080; V. 75, p. 505; V. 79, p. 213; V. 81, p. 212.

The N. & W.-Pocahontas joint bonds are secured by about 295,000 acres of coal lands owned and held by the Pocahontas Coal & Coke Co., whose stock is owned, of which about 50,000 acres have been leased to companies whose stock is all owned by the U. S. Steel Corp. and 39,797 to other concerns, the royalties under such leases alone being shortly expected to be sufficient to almost meet the fixed charges. They are subject to call at 105 since 1906 for a sinking fund of 2½ cents per ton mined. V. 73, p. 845, 902; V. 74, p. 41, 380, 1197; V. 75, p. 502. These bonds are the joint and several obligations of the Railway Co. and of the Coal & Coke Co., but as between the two companies the debt is to be paid by the latter company.

Divisional 1st lien and gen. mtge. 4s of 1904 ($35,000,000) authorized for future capital requirements are a 1st lien on extensions and branches not covered by the 1st consol. mtge. aggregating 220 miles, and upon such extensions and branches as may be acquired from the proceeds of the new bonds and also a lien subject thereto upon the properties covered thereby. V. 78, p. 1549; V. 79, p. 501, 628, 973, 1642, 1704, 2148; V. 80, p. 1175; V. 82, p. 510; V. 83, p. 1471; V. 88, p. 231, 453.

The convertible bonds, of which $25,569,000 were issued 1907-10 (V. 83, p. 380, 435, 575) are convertible into common stock, $ for $, prior to June 1 1917, and thereafter subject to call at 105 and interest. The stockholders on Oct. 13 1910 authorized an issue of $50,000,000 convertible bonds. V. 91, p. 463. See below.

PITTSBURGH & SHAWMUT RAILROAD.—Organized to establish an outlet to Pittsburgh for Pitts. Shawmut & Northern RR., which see below. Is building 102 miles of road from Brockwayville, Pa., to Freeport, Pa., on the Pennsylvania RR., 28 miles northeast of Pittsburgh. Freeport is at head of slack-water navigation of the Allegheny River (under plans of U. S. Gov't), thereby forming a water route for freight traffic of the Pittsburgh district to Ohio and Mississippi River points and the Gulf of Mexico. The road completed is leased to Pittsb. Shawmut & Northern RR. Co. at a rental equal to the net earnings of the P. & S. RR. plus 10c. per gross ton on coal delivered by the P. & S. RR. to the P. S. & N

In 1910 sold $4,000,000 of an authorized $12,000,000 of 50-year 5% gold bonds due Dec. 1 1959, but callable at 105; annual sinking fund, $100,000 beginning Dec. 1914. The bonds are secured on the 79 miles in operation and 23 m. to be completed in summer of 1912 (total, 102 m.); also pledge of $11,953,000 of $14,491,000 ref. 4s and $58,000 of $164,000 Pitts. The P. & S. RR. Co. has deposited with the trustee funds sufficient to pay the interest charges on these notes until their maturity. V. 93, p. 45. As to earnings, see P. S. & Nor. RR. below.

DIRECTORS.—Theo. P. Shonts, Wm. H. Taylor, Frank Trumbull, Thomas H. Hubbard, Edwin H. Tait, Harry Bronner and Henry E. Huntington.—(V. 92, p. 188, 463; V. 93, p. 45.)

PITTSBURGH SHAWMUT & NORTHERN RAILROAD.—Operates a road extending from bituminous coal fields in Elk and Jefferson counties, Pa., northerly to Wayland, N. Y., a distance of 152 miles, with branches. The enlarged system will aggregate 300 miles and will, it is stated, form the shortest and lowest-grade route of any existing line between the Pittsburgh region and central New York and the New England States, via the Erie and the D. STOCK TRUST CERTIFICATES.—Kansas City Ft. Scott & Memphis Ry., Kansas City to Memphis, Tenn., with branches, 919 m., was acquired in 1901; its entire stock is owned and road leased for int. on bonds and 4% on pref. stock trust certfs. (see above table), the 4% ref. bonds being guar., p. & l.; see K. C. Ft. S. & M. in this issue and V. 72, p. 438, 532, 581, 1238.

In July 1905 all of the $7,217,800 common and $6,211,700 of the $8,830,700 preferred Chicago & Eastern Illinois Railroad stock then outstanding had been acquired, the St. Louis & San Francisco giving in exchange its stock trust certificates at the rate of $100 for each $100 share, upon which 10% and 6% dividends, respectively, are paid. In 1905 the holders of a majority of the com. stk. trust certfs., preferring to have a security redeemable at par instead of at the rate of $250, exchanged their certfs. for a new form in the denomination of $1,000 each, representing the deposit of four shares of stock. Int. on these latter certfs. is payable at the rate of 4% per annum, so that both the income and prin. are unchanged —only form of security being changed. (See form ,V. 80, p. 1857). In Oct. 1911 authority was given to list $4,000,000 additional pref. stock voting trust certfs. up to a total of $10,211,700; total listed June 1912, $8,276,000. See Chicago & Eastern Illinois on a preceding page.
